All living things and their habitats
 I can explore and compare the differences between things
that are living, dead, and things that have never been alive
• I can identify that most living things live in habitats to which
they are suited and describe how different habitats provide
for the basic needs of different kinds of animals and plants,
and how they depend on each other
• I can identify and name a variety of plants and animals in their
habitats, including micro-habitats
• I can describe how animals obtain their food from plants and
other animals, using the idea of a simple food chain, and
identify and name different sources of food.
Plants
 I can observe and describe how seeds and bulbs grow into
mature plants
• I can find out and describe how plants need water, light and a
suitable temperature to grow and stay healthy.
Animals, including humans
• I can notice that animals, including humans, have offspring
which grow into adults
• I can find out about and describe the basic needs of animals,
including humans, for survival (water, food and air)
• I can describe the importance for humans of exercise, eating
the right amounts of different types of food, and hygiene.
Uses of everyday materials
• I can identify and compare the suitability of a variety of
everyday materials, including wood, metal, plastic, glass, brick,
rock, paper and cardboard for particular uses
• I can find out how the shapes of solid objects made from some
materials can be changed by squashing, bending, twisting and
stretching.
